LGBT Online Activities

Of all the forms of inequality, injustice in healthcare is the most shocking and inhumane.
Dr. Martin Luther King, Jr.

Student Learning Outcomes:

- Examine specialty populations in the community including LGBT.

Complete the following online activities related to Gender & Sexual Diversity which is a growing population in Pediatrics. We have approximately 158,500 LGB Youth between ages 13-17 in Texas, along with an additional 13,800 Transgender Youth in Texas.

According to the Texas Nurses Association, Rule 217.11 Standards Specific to Registered Nurses, we are to "Provide, without discrimination, nursing services regardless of age, disability, economic status, gender, national origin, race, religion, health problems, or sexual orientation of the client served.

Remember that we all have "Implicit Bias" which is reflective of our attitudes (positive and/or negative) or stereotypes towards people, things, or groups that can affect our understanding, actions, and decisions in an unconscious manner.

As a health care professional, we must respect our patient's/client's choices, whether or not we understand or agree – they are the expert of their life.

Self-reflection allows us to understand our own belief systems, the assumptions that ground those beliefs, and how those assumptions and belief systems impact interactions with our patients/clients.

Complete the Gender Diversity Terminology Quiz. Answers are provided for you to evaluate your knowledge level after you have completed the quiz (you do not need to email the quiz to Mrs. White). (13 minutes)
