Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Bridget Winn - Covenant Medical Center

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? I was able to observe several pap smears and breast exams, as well as the removal of two IUDs. I wasn't able to participate in any Procedures.

2. What was the best/most interesting part of the experience?
The best part to me was the variety of patients that came in, and Doctor Winn's ability to gather information and formulate a plan.

3. Is a community nursing position something that you would consider working in? Why or why not?
most likely not, primarily because working in a doctor's office has never appealed to me. The ER is where my passion is.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?
Yes, Doctor Winn was very efficient and attentive to her patients' needs. She's very empathetic and very good at her job.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?
Yes, Dr. Winn mostly educated on hormonal cycles and how they're affected by different medications and birth control. Yes, Dr. Winn was able to effectively teach her patients and answer all questions.

Covenant School of Nursing

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	**Clinical Judgment**	**Patient Centered Care**	**Professionalism**	**Communication & Collaboration**
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	*Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.*	*Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.*	*Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.*	*Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.*

Safety & Quality:

Clinical Judgment:

Patient Centered Care: There was a patient with Lupas and siezure disorder who didn't want kids after discussing it with her husband. The doctor was able to give her various options for birth control other than the Estrogen & Progesterone pill due to her various co-morbidities.

Professionalism:

There was a patient who wanted an IUD removed and was very unhappy with how it was working. The doctor maintained professionalism, as did I, and respected the pt's wishes and removed the device.

Communication & Collaboration:
