Student Name: Marcia Mata **Date:** 1-18-24

Instructional Module 6
Obstetrics Community Clinical Experience

Community Site: STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed people of all ages, races come into the site. I was able to draw blood, urine samples, throat swabs. HIV test.

2. What was the best/most interesting part of the experience?

Most interesting part was being in the lab & looking at specimens under the microscope.

3. Is a community nursing position something that you would consider working in? Why or why not?

I never considered, but it may be something I might consider. It's fast paced but more relaxed environment in a way.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, they definitely meet the need with testing, providing education, and medications. also preventative measures.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, the nurse I was with provided good education. She taught preventative treatments & options for safe sex. I believe the patients that went into the clinic left with more knowledge than when they went.
