IM6 Student Learning Outcomes				
Safety & Quality	**Clinical Judgment**	**Patient Centered Care**	**Professionalism**	**Communication & Collaboration**
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	*Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.*	*Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.*	*Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.*	*Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.*

Safety & Quality:

9/10 **Clinical Judgment:** GBS
mother was positive w/GBS (bacteria mom has built immunity), ~~however~~ therefore Penicillin is admin prophylactically to prevent infection to baby (low immune system), home care scenario (sepsis).

Patient Centered Care:

9/17 **Professionalism:**
NP would introduce herself when entering room, and would check-in with pt being comfortable with a student nurse observing. many of these pts were there for a pap smear, NP explained procedure, and created an environment for pt to voice concerns.

Communication & Collaboration:
9/9 I observed the collaboration among the pediatrician, lactation consultant and M&B nurse stress on the importance of 2-3 hrs for feedings to avoid breast engorgement/have sufficient milk supply.
