Covenant School of Nursing Reflective Practice

Name: Christopher Tsai Instructional Module: M6 Date submitted: 02/13/2024.

Use this template to complete the Reflective Practice documentation. Use only the space provided. Information that is not visible is lost.

Step 1 Description

During this clinical rotation I went to Oceans mental health facility to experience the daily schedule of the psych nurse. I speak with multiple psych patient and Joined their group therapy and also The treatment team meeting.

Step 2 Feelings

. It is pretty unique experience to me. I never had a long conversation and up close to talk with a psych patient. Some of them you can clearly tell there is mental issue going on. others are really hard to tell, they have good logic clear responses.

Step 3 Evaluation

The Oceans is a pretty new facility. multiple patients told me they like it here more than other mental health/nursing facility. I think the health care team here ~~give~~ provide good service and care.

Step 4 Analysis

I spent the whole morning talking to different patients. And found out later the stories and information the patiens told me were all made up. The nurse told me most of their life stories were not in pt hx just delusion.

Step 5 Conclusion

I learned that some mental patient can talk and act pretty normal/Logical. But they can be manipulative and just make up stories to feel better. I was pretty invested into few patients ~~o~~ life stories, turn out all made up.

Step 6 Action Plan

It is also a good experience join the treatment team meeting. Therapist and nurses/doctor all Join together and discuss about each patient, their progression and treatment plan. So I can get a picture how mental health facility function and help their patients.
