Firelands Regional Medical Center School of Nursing
Nursing Foundations 2025
Skills Lab Competency Tool

Student Name: Alyssa Lewis

Comments:

Week 1 (Technology Lab): During this lab you were able to satisfactorily navigate:

- Edvance360 Learning Management System.
- Skyscape Resource System.
- Assessment Technologies Institute (ATI) / Shadow Health.
- Guided tour of library and computer lab. HS

Week 2 (Hand Hygiene; Vital Signs; PPE): During lab this week you were able to satisfactorily demonstrate:

- Appropriate hand hygiene utilizing hand sanitizer and soap/water.
- Accurate verbalization of procedure for donning & doffing PPE.

Appropriate level of skill during guided practice with measurement of radial and brachial pulses, along with manual blood pressure. Vital signs skills will be observed 1:1 with faculty during Week 3. Keep up the good work! HS

Week 3 (Vital Signs):

Great job in lab this week! You successfully completed the vital signs check-off during 1:1 observation, including oral temperature, radial pulse, respiratory rate, pulse oximetry, and blood pressure measurement. During the blood pressure assessment, you accurately obtained two consecutive readings on the Vital Sim manikin. The first measurement was set at 100/66, and you recorded it as 99/64—within the acceptable range for accuracy. The second measurement was set at 122/66, and you interpreted it as 121/68, also well within the desired range.

In addition, you demonstrated strong knowledge by verbally discussing axillary and rectal temperature measurement. Unfortunately, you were unable to satisfactorily verbalize the process for assessing orthostatic blood pressure during the initial vital signs check-off, resulting in an unsatisfactory evaluation. Remediation was conducted on 9/4/2025 at the end of lab. Following remediation, you successfully demonstrated understanding of the process and achieved a satisfactory evaluation. Your documentation was thorough and accurate for the vital signs; however, you omitted the pulse rate (84). Be sure to take some time to review this documentation next time you are in lab. Overall, excellent work—keep it up! BL

Week 4 (Assessment):
Week 5 (Assessment; Mobility):
Week 6 (Personal Hygiene Skills):
Week 7 (NG Skills: Insertion, Irrigation, and Removal; Feedings):
Week 8 (Foley Skills: Insertion, Removal; Sterile Gloves; I&O, Documentation Lab):
Week 9 (Wound Care: Dry Sterile, Damp to Dry Packed, Stoma Skills):
Week 10 (Safety; Infection Control; Prioritization; Weight; Pressure Ulcer Prevention; Soft Restraints; Doppler BP):
Week 11 (Medication Lab):

7/8/2025
