Student Name Avery Baldree Date: 12/3/24

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? I got to do blood draws, finger pricks, and throat swabs throughout the day! I also got to go in the lab and help run the tests!

2. What was the best/most interesting part of the experience?
I think the most interesting part was getting to learn how to do all the different tests!

3. Is a community nursing position something that you would consider working in? Why or why not?
Maybe! I like getting to help the community but I also enjoy the hospital setting!

4. Do you feel like this community site met the needs of the population they serve? Why or why not?
Yes! They are all working very hard to bring the syphilis numbers down in Lubbock. They also provide a very non judgemental environment!

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?
Yes I did! There was a lot of teaching on syphilis and the medication & timing on the medication! Yes I feel like the teaching was adequate because everyone understood what she was talking about!
