Simulation		
Scenario	In this virtual simulation, you cared for Lea Seko. The goal was to complete a focused respiratory assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You met the requirements to complete this virtual health assessment scenario.	**Score:** 81.6%
Essential Actions	**Required actions - 16 of 19 correctly selected** You have demonstrated a basic understanding of the required actions to complete a focused health assessment based on this client's health status.You demonstrated an understanding of the following required actions: auscultating the anterior chest, auscultating the posterior chest, communicating with the client to elicit additional information, inspecting the head and neck, inspecting the upper extremities. Spend time reviewing: • Inspecting symmetry of the anterior chest • Inspecting symmetry of the posterior chest • When to sanitize hands when completing client care	
	Interactive actions - 1 of 2 performed correctly You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status. Spend time reviewing the following assessment techniques: • Auscultating breath sounds of the posterior chest	
	Expected/unexpected findings - 7 of 9 correctly identified You demonstrated a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status.You demonstrated an understanding of the expected and unexpected findings of the following: auscultating the anterior chest, auscultating the posterior chest, inspecting the head and neck, inspecting the upper extremities. Spend time reviewing the expected and unexpected findings of the following: • Inspecting symmetry of the anterior chest • Inspecting symmetry of the posterior chest	

Neutral Actions	**Neutral actions - 5 selected** Neutral actions do not help or harm the client. • *Only* questions specifically related to the focused respiratory assessment are necessary. • *Only* steps specifically related to the focused respiratory assessment are necessary.
Actions of Concern	**Order violations - 1 selected** Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to place or remove gloves when required; or fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.

EHR Chart	
Instructor Review Status	Not Reviewed
Instructor Review	This chart has not been reviewed by the instructor. This report will populate with additional information when the status has changed.
Instructor Feedback	Instructor feedback can be viewed by accessing the link on the on-line version of this report. If your instructor has enabled the Expert EHR Chart, you may view the example in the attached page.

Expert Chart
Lea Seko

This expert chart is intended to assist in evaluating student performance in documentation for this activity. Only the tabs and tables of the chart that warrant entries are included, and the expert responses for comparing against student responses are indicated with bold text.

Lea Seko (F) **MRN**: 2774131 **Allergies**: Seasonal	**DOB**: 45 Years old **Height**: 66 in **Weight:** 150 lb	**Attending**: Maria Lester MD **Code Status**: Full code **Comments**: none

Flowsheets

Admission

	HH 5.0 Minutes after start
Admission Problems	
Chief Complaint	
Principal Problem - Admission Diagnosis	**Exercise-induced asthma**
Other Problems/Diagnosis	
History of Present Illness/Injury	
Location- (Where are the Symptoms located? Are they local or do they radiate?)	
Duration- (When did it start? How long has this problem existed? Is it getting worse? Changing?)	**30 years**
Timing- (When does it occur? Night or day? At work? etc.)	**Shortness of breath if forgets to use inhaler prior to exercise**
Quality- (Characteristics such as constant, sharp, dull, sore)	
Severity- (How bothersome is the problem? Can you sleep, work, etc?)	
Describe this illness/injury related to how and where this problem began.	
What makes this problem worse or better?	**Cold weather worsens but is still manageable with inhaler**
Signs and Symptoms

HH 5.0 Minutes after start

Allergies

Seasonal Date allergy noted: Stuffy nose, watery eyes.	Reviewed Allergen added/edited

Home Medication List

Calcium	
B12	
Albuterol	Is patient taking medication? Taking Last taken: Yesterday Used yesterday prior to going for a run.

Family History

Asthma/Allergies

Family members affected:
Pt's Sister "she outgrew it"

Immunization Screen

Tetanus	
Influenza	Yes
Pneumococcal	No
Hepatitis B	
DPT	
Polio (IPV)	
Chicken Pox (Varicella)	
Measles, Mumps, Rubella (MMR)	
Additional immunization, Comments	Plans to get pneumonia vaccine

Flowsheets

Assessment

	HH 15.0 Minutes after start
Respiratory	
Resp. Effort/Pattern	Bilaterally even and unlabored
Breath Sound, Comments	Symmetrical movement bilaterally with inspiration and expiration. Lung sounds clear bilaterally. Loud, high-pitched bronchial breath sounds over the trachea. Medium-pitched bronchovesicular sounds over the mainstem bronchi, between the scapulae, and below the clavicles. Soft, breezy, relatively low-pitched vesicular breath sounds over most of the peripheral lung fields.
Cough	
Sputum	
Resp. Interventions	
Intervention, Comments	
Respiratory Airways/Drains	
Airway/Drain, Comments	
Oxygen Source	
Oxygen rate and comments	
Integumentary	
Skin Color	Appropriate for ethnicity, Even distribution
Skin Temperature/Condition	
Skin Turgor	
Skin Comments	Skin tone of nailbeds is even and consistent with genetic background.
