## Training Email: taking breaks

Good morning,

I am writing this email in response to a recent ORR substantiation that involved employees taking breaks together. Part of our remedial action is to let everyone know that employees should stagger their breaks if taking breaks together means that we aren't supervising the Residents according to supervision standards in all the Residents' IPOS, BTP or according to Beacon Policy.

For example, if there are two employees on shift and both are outside smoking for a sizable amount of time without the ability to hear/see what is happening, who will notice if a Resident needs help or if something happens? Please be mindful of break times and add this topic to your home meetings so employees can keep residents safe and avoid a recipient rights substantiation.

Thank you,
