Medication

Administration In-Service and Evaluation

	b. Liquid medication is poured at eye level on a flat surface, with palm covering label of the stock bottle								
	c. DMA verifies medication and strength with an order as transcribed on medication record per facility policy and procedure. Note: Strength and dose are not always the same.								
	d. Observe Resident to ensure medication is swallowed. If orally disintegrating medication is given, place in appropriate cup and ensure medication dissolves.								
	e. Offer adequate and appropriate fluid with medication, full glass of water unless otherwise ordered. Note: Any fluid restrictions, special instructions (nectar thick, etc.), or potential adverse fluid interactions (grapefruit juice)								
	f. DMA should initial the medication the first time they use it at the top of the bubble pack. Initial and date in back								
	g. Medication record is signed immediately after administration of same. Add initials to box on MAR and complete back page or on EMAR choose Pass selected. Choose exceptions if needed and document. Check for any blanks on MAR or EMAR and utilize a Late med pass or proper documentation. Any exception requires a misc. note to be completed. This should be completed at every shift change								
	h. Controlled substance record is signed immediately after administration of same. The controlled count is done at shift change and when administering medication.								
	i. Verify no additional MAR pages have been added, check the high alert board and shift change agenda.								
	j. Infection control technique is reviewed, Handwashing and Universal Precautions.								
9	Medication via gastric tube administered per facility policy and procedure. If applicable Medical will provide hands-on education, support, and training. <ul style="list-style-type: none"> Resident is properly positioned, at a 45° sitting angle Tube is checked for placement and patency Tube is flushed before between and after medications are administered 								
10	Injections are administered by the Resident if there is a physician and psychiatrist order present, or DMA, per facility policy and procedure								
	a. Syringes and needles are disposed of in a sharps container, by the person giving the injection (should be the Resident, unless otherwise ordered by PCP) without recapping. Sharp's container must be dated 90 days out for expiration once you begin using.								
	b. Proper glucometer testing is observed. Determination of competence re: accurately perform and read glucometer testing results. Still must remain with resident and verify accurate information and document.
