

MA 111 Medical Assisting Lab

Critical Thinking Week 1

Name:

Date:

1. Why is it important to remove patients from the waiting room with acute infections as soon as possible after they arrive?
2. Differentiate between sanitation, disinfection and sterilization.
3. Why would a temperature taken oral, rectal and axillary not have a common value of 98.6°
4. Describe the difference between medical asepsis and surgical asepsis.
