

Ann Small

Week 6

Case Study

1.) I believe that Dr. Phil did have the right to go and visit Britney Spears as he was showing his concern for her. With the comment he made, I believe that he was not in the right to share that with the public as it will then get everyone else involved. Although a person is famous, it still does not give the right for them to release any private or medical information to anyone else especially the public. With making this statement it can raise multiple issues, as there will now be more people trying to get involved with her situation whether that be more medical facilities or counseling. Sometimes when a person's information is released like that then it can raise and cause more issues for that one specific person and will actually cause them to get worse.

2.) With this information being released to the public, although she is famous it also can affect how she is famous to the people. Although many times if something happens to a famous person or celebrity they still look up and admire them, but in some cases, it can change how someone looks at a person completely. As for behavioral healthcare issues, with the public and fans hearing this statement about her, it could cause her to have more medical issues than she did before because of all the stress and comments that will then be made.
