Developed Koch's postulates

Walter Reed

Paul Ehrlich

William Roentgen

First women to win a Nobel prize in physics

Discovered penicillin

Albert Sabin

Inventor of the Apgar score

Developed the injectable polio vaccine

Mathilde Krim

#2

I chose Clara Barton because I feel without her courage during the civil war and her ambition to help people in need or distress, we wouldn't have the wonderful organization the red cross here today over 100 years later. The red cross still plays a big part in our medical field due to the blood banks and all the emergency relief that comes from the American Red Cross around the world.

#3 Occupational Safety and Health Organization

#4 Health and Human services

#5 Center of disease control

#6 National Institute's of Health

#7 It began in the 1950's

#8 founded in 1956, The AAMA designates who has achieved certification through the certifying board of American Association of medical assistant.
