CS 115 Intro to Computer Applications

Research Device Project

On this assignment for lesson one, I researched three of the newest smartphones on the market for Verizon Wireless. The phones I choose was, Apple iPhone 11 Pro Max, Samsung Galaxy s10, and Samsung Galaxy s20 Ultra 5G. I picked these three because they stood out to me while I was scrolling through the online store. When I was researching these three devices, I had to choose what one would better fit my personal needs. While doing this homework project, this also helped me do research for myself because I am on the hunt for a new phone because the one I have is a Samsung Galaxy s9 and the battery life is not the best at the moment. I would like to update for a better, newer phone but with COVID 19 things have not been open. I do not want to buy a phone online because I would rather go inside and look at the different phones and then purchase the one, I pick out. The phone that I chose to pick out of the three was the Samsung Galaxy s20 Ultra 5G because I found it is much faster and has a surprisingly good camera. This phone also had a good battery life as well. The device that I choose would be the Samsung Galaxy s20 Ultra 5G out of the two other ones. When I was deciding on what I wanted for a phone I went through Apple and Samsung. Those are the most popular phones on the market. I had to really think about the choice of phone I wanted to go with because I read that Apple iPhone has good features and the Samsung also had good features. For Apple iPhones you can do much more than a Samsung. I think both of those choices are better than the Samsung Galaxy s10 I researched because the camera was not that great. When I was researching these three devices, I was trying to weight what one would fit my personal needs and I want to have a phone with a good battery life and better features. The Samsung Galaxy s20 Ultra has all the things that I am looking for in a phone, only thing is I am the only person out of my friends who do not have an iPhone. The cost of this Samsung is \$1399.99 but the payments a month are \$58.33 which is not too bad. This phone comes in two base colors, a cosmic grey and a cosmic black color you can chose from. This phone is equipped with a first of its kind 108 MP camera, more power, speed and options for doing the things you love. This phone also has ultra-bright night, 100x space zoom, boost battery in minutes with super-fast charging, battery life is longer, and ultra-video viewing. All these features are good to have on this phone because you can watch videos, take good pictures, and you can go all day without worrying about your phone dying which is awesome. When I was looking online at these different phones, I checked the reviews to see what the comments where and the Samsung Galaxy s20 Ultras had some good comments. I love smartphones because they can do so many

kinds of things and in the app store you can find workout apps, music apps, games, Netflix, fast food apps, and so much more. I could purchase some accessories for this phone. I could get a new phoner case, screen protector, wireless charging pad, and some air buds. When you purchase this phone from Verizon Wireless, they activate it for you. Once the phone is all activated you can access the features from the home screen. If you have an old Samsung you can transfer your old pictures, videos, and contacts to the new phone. I think the Samsung Galaxy s20 Ultra is a good phone for me because it would work out well for me and has everything I am looking for in a phone. Also, the price is not that bad, Therefore, I picked the Samsung Galaxy s20 Ultra out of the other two phones I had researched.
