Criminal Law

7/18/2020

Drug abuse and drug-related crimes are the topics I want to focus on. Particularly the prevention of reducing the number of drug-related crimes. I would like to further research as to what crimes are committed by people who abuse drugs. Off the top of my head, drug addicts have a problem with stealing/robbing for quick cash to get their drug fix. Prison and jails need more resources and guidance for those addicted to drugs because they become repeat offenders without proper treatment or help. Also, people claim that it's easier to get drugs in jail than it is to get them out on the street.

Community-oriented policing would be beneficial, in my opinion. Get law enforcement involved with helping find resources and keeping drug-related crimes and activities away from the community.
