

Learning Activity Week 3
Zennellia Brantley

1. Five Ways Nano Technology is securing our future.

Author: Themis Prodromakis

<https://phys.org/news/2016-03-ways-nanotechnology-future.html>

This source is credible because he is a reader in nanoelectronics and Themis Prodromakis receives funding from the Lloyds Register Foundation, the EPSRC and the EU Commission

This source was published March 22, 2016 and I believe it is still relevant.

I will use this source to support information obtained through my research

2. Author: National Nanotechnology Initiative

Benefits and applications

<https://www.nano.gov/you/nanotechnology-benefits>

This source is credible because it is an official site of the United States government. There is no exact date of publication but I believe all information is recent as the advancement of technology is available.

I will use this source to help show the benefits of my research.

3. Author: Dr. Amarpreet S Dhiman

The role of Nano technology in drug discovery

Article written April 16, 2006

This source is credible because the author is an Dr focusing on the area of drug discovery and clinical diagnostics.

I will use this source to support my idea on nano drug delivery systems.
