

1) Your name, your colleagues' names

My name is Dennis Kiprono.

My colleagues are Japhet Kipruto, Kelvin Saxton, Jakis Young, Mariah Cobbin, and Olivia Hyland.

2) Your career/research interests

I am interested in genetics and human anatomy. My career demands that I understand the Human body System and narrow down to basic units that make up the body system.

4) How your interests/field relates to one of your colleague's field/interests

My colleagues' interests and my interest depend on each other so that we have a holistic approach in addressing issues in health.

5) 3 *SPECIFIC* subjects you want to learn more about (subjects for your 10-12min talk and research paper)

Respiratory anatomy, cancer genetics, and digestive anatomy are the topics I want to know more.
