

The Puzzle of Personality

3 things that I have learned:

1. Extroverted women have more than extroverted men
2. I did not know that personality psychology existed
3. That introverts and extroverts speak differently

2 things I am still curious about:

1. I am still curious about the three natures that extroverts have
2. That we are like some other people but we are like no other person (I really like this saying too)

1 thing I still do not understand:

1. I did not know that extroverts need stimulation
