List 5 TAKEAWAYS

1. I learned that the placenta is a separate delivery, I believed that the placenta came straight out with the infant.
2. It takes three to four days to fertilize an egg
3. I also did not know that the fertilized egg attaches to lining found in the uterus
4. The sperm breaks down into multiple cells to fertilize the egg
5. I learned that sperm can last up to five days after ovulation.
