

**Anuli Segree**

**STEM 221**

### **My Elevator speech**

*Hi, my name is Anuli Segree. I am currently a sophomore student at Benedict College majoring in Biology. I am a member of the Honor Program here at Benedict and hope to hold an executive position before graduating. I have always been fascinated by the way our body work and I want to understand it on a cellular level. This summer, I completed an internship with my College doing research on Breast Cancer cells and next summer I hope to find an internship to gain further knowledge in Cell and Molecular Biology. To be able to help someone in the process of me gain knowledge and understanding is motivation for me to work hard to accomplish my goals.*
