

Cheyenne McFarlane
ED 221

Someone who inspired me to choose my major was my mother. My mom told me basically to learn the basics of a business so you don't have to pay people to do it for you. She said you have a mind of gold and people with a mind of gold are fortunate in businesses that they run. Basically don't think you have what it takes to run a business.

It was my mother's strive and consistency that allowed me to see how much it is possible to do anything you want to do, my mom had three kids and learned how to do everything she wanted while taking care of us at the same time. She showed us how much things were possible. She told us how to chase our dreams and make them reality. So that's how she inspired me into my major.
