

Amazing Grace" is a Christian hymn published in 1779, with words written in 1772 by the English poet and Anglican clergyman John Newton (1725–1807). Amazing grace was a musical illustration of Newton's life's struggles and a testament of his perseverance. Amazing grace was written in 1772 , but was not published until 1779.. The song Amazing grace has been used in many capacities since it's release . It has been used in normal religious services , special religious services , weddings , and is most recognized at funerals . Amazing Grace is a song that had the ability to take you to that special place in life to reflect on hardships and what it took to overcome them . In the video the instrumentation is a synthesizer I would say because I did not see any strings . The choir appears to be outside and that was different for me to witness because usually when you hear spirituals or religious music , you hear it in a close setting like a chapel , a hall , or a church , but they were out side . It resonated with me because I saw that though the weren't in a traditional setting ( church ) I still felt the same way about the message or the meaning of the songs . That shows that if a song is well put together no matter where you are you will feel the song. .Amazing grace is sung all over the world by many different race and ethnicities , and will continue to happen all around the world
