Who Switched Off my Brain Video Summary

Who Switched Off my Brain, a power packed video by Dr. Caroline Leaf. You can join the video clip in your leisure and receive a life change forever in your brain. Dr. Caroline Leaf, a prolific oracle for all ages, come to you in words of encouragement. Full of ambitious thoughts, and words that makes an impact that can not be erase. She starts her session with prayer for those under the sound of her voice. She also demonstrates the size of the female and male brain.

Dr. Leaf, says “we are able to change our minds, mouth, moods, and attitude.” She encourages all those in attendance informing them of the brilliance that resides within. It is all about the brain connection not the brain size. “We are more than capable of changing our own brain. Because we are in control and able to perform our own brain surgery,” said Dr. Leaf. She explained that there are two roots: one, love of which we are wired with from birth and two, fear which is learned, and abnormal we could name it a counterfeit. She gave views of how words are first a thought which forms into attitudes, words, and one’s behavior. Toxic thoughts are attitudes and contagious to others.

In summary, we need to understand God gave us the ability to choose. Read in your leisure Ecclesiastes 3:11 and Deuteronomy 30:19 which informs us about how we are to choose what we want to say and do. She has given me a new view of my thoughts. How I can break the cycle of toxic thoughts and I can change my thoughts.
