

Greetings Professor Malone,

I read your message and understood your concern on us studying the complexity of the Old Testament texts. I honestly do not have an extensive knowledge of the chapters yet to come in our class study, hence I do not have many specific topics in mind that I could write about.

If you allow me, I would like to write an analysis about ***the impact of the Old Testament on modern life***. As we have learned, many laws and rituals described in the scriptures, reflect the values of the society that produced it. But at the same time, it is fascinating that until nowadays, most Christians follow many of those laws as a the only true word of God.

It's going to be a challenge, but certainly it will bring some light to new interpretations and it will allow me to discover a new world within the scriptures. I'm sure that despite the inconsistencies, those words have a meaningful and powerful impact on today's society.

Rodrigo Souza
