### LEADERSHIP SKILLS SUMMARY

After reading and learning about the different leaderships skills in chapter six, it has given me the opportunity to examine myself as to whether or not I have these skills and techniques that is needed as leader within myself. Just like the author stated in the beginning of the chapter, whether you are learning how to play a guitar or video game, you still need special skills in order to be successful in that. I also believe that the three major skills needed administrative, interpersonal and conceptual skills are very important to have. We must set the foundation for ourselves and followers in order to succeed in our organization and business as well.
