

## Peer / Self Evaluation

### Week 7 Discussion Board

#### Oral Presentation on Education Concern

##### Non-verbal Skills

Eye Contact: Eye contact was pretty good I think. With the help of a small audience this time I was able to engage a little bit better.

Facial Expressions: My facial expressions varied during this presentation, for whatever reason. Hopefully because I felt more comfortable this time.

Gestures: No visible gestures.

Posture: Posture was good. Seemed a lot more comfortable this time.

##### Vocal Skills

Enthusiasm: More enthused with the material and engaging. Was more familiar with the material this time.

Vocalized Pauses (uh, well uh, um): About the same. I think there was one instance where I became a little confused.

##### Content

Topic Announced: I think I did a good job announcing what I was going to talk about.

Time frame: A little over 5 minutes and I thought that was good.

Completeness of Content: I did state my main idea from the beginning and I backed it up with facts.

Professionalism of Presentation I had a lot of information with some knowledge about the information. I believe I presented this information with more authority. That can only happen if I'm knowledgeable about what I'm presenting. Will continue to improve.
