### Internship September 2017

My outside internship had to cease because the call was for inside internship. Beulah Heights University Chapel turned into my internship. I had to use it as my learning experience for use in the future of how you should present yourself, how you should dress, how you should start the welcome to the Church. First speak to the Pastor, and their spouse, the associates, and then the congregation. Then if you have family we can address them also. Chapel news is one of the best sit-ins you can be involved with. You will see the Prophets that the Lord has sent; they are always on point of everyday life. I did not miss a week in September. They give plain understanding of God's word, and which way to move regardless how large or small the congregation is. Find a song to start with if you choose too. And out of all of this I got are you stick with Jesus He will not leave you.
