11.2 Core Values Questionnaire

This questionnaire is designed to identify my core values most important to me and to reinforce core values and their roles in ethical leadership. By putting stars next to all the values that are important to me, including those that I added as my personal sets of values, and after going through the first process of bundling, (embedding one value in another and counting two or more values as one), I narrow the starred values to my top eight values by crossing off the values that are less important to me and circling the more important values. Out of the circled eight, I narrow the list to five important values and then three, using the same process. From these three values, I choose my top two core values which are Integrity and love as revealed on the chart below.

❖ Peace	❖ Honesty	❖ Influence	❖ Patience	❖ Truth
❖ Wealth	❖ Forgiveness	❖ Justice	❖ Faithfulness	❖ Wisdom
❖ Success	❖ Authenticity	❖ Integrity	❖ Love	❖ Trust
❖ Friendship	❖ Power	❖ Joy	❖ Family	❖ Freedom

Top Value Interpretation

As an ethical leader, I now know what my core values and hope to have the courage to integrate them with your actions, being mindful of the common good of my organization as Value words are packed with meaning. I understand that my core values can help me make difficult decisions as a leader as well as help me find common ground with others.
