In partial fulfilment of the requirement for the course

ATH640 Christ and Community : Faith and Action for Social Transformation

Department of Religion studies

June 15, 2018

Social justice issues is a main problem in our church because our resources are limited.

Our church has not being lead in this direction in the past.

The way I am trying to attack this culture in our church is theological and philosophical. I

Will be using the scriptures in a theological way. Philosophically I will be letting our

congregation know the resourceing that we find here on earth was meant to be shared

because it is unjust not to share them with those that are are need.

Jesus taught His disciples to share something out of the money bag that they had in

Their group. We know their resources were limited but Jesus for them to share by

Breaking and sharing what they had.
