ATH640 Christ and Community: Faith And Action For Social
Transformation

Professor Monte Norwood

Graduate Department Of Religious Studies And Theology

July 10, 2018

The problem: Our congregation is a traditional congregation. It is stuck in the way things used to be done in the church.

Purpose of the this paper: I want to by vision show our congregation that what used to work in our fathers and mothers does not work in today's church.

Strong argument: The church of today has to use the tools of today. The minister has to have visions for today's church. In this paper i will be showing our church visions the church can used today.

Stronger argument: We have to do things that interest young people in our church. This also apply to the young people in our communities.

Strongest Argument: things have changed and we have to change with them. Cars don't move on Sunday Morning like they use to.

Conclusion: Summary of arguments.
