

### What is a leader?

When we look at what a leader is I would like to look at the life of Paul who was formerly Saul. I believe a leader is someone who can inspire and motivation others to effective in helping others. Paul was one who continued to inspire others through his life while in bad places like jail. Normally people in jail are more focused on getting out. I believe a leader has the ability to see pass what they are facing and push others to greatness. You when see good leaders they promote growth and change the atmosphere, where there is strife they bring peace, where there is fear they bring faith. I believe another way people inspire others is by being who God created them to be, we have enough people trying to be like others. Being a genuine leader helps others to see they can be who they are.
