

## **Argumentative Essay #1**

### **Gang Violence:**

The rate of gang violence has been reported to be a high topic. In many large cities in the United States today. The crime rate and involvement has increase throughout the our Hispanic and Black communities. In some of the varies countries. It is not only known now for young men being a part but also young women. Many families become included because of the gang member involved.

It's stirs from all different behaviors, racisms and, personality issues. It has its own membership rules and regulations. They are known to be very violent and sometimes deadly in many cases. In some of the larger cities such as some areas of California and Michigan. It has destroyed the communities and have brought much pain and grief. In event of the violence it can be very dangerous for the members own family. The impact of drugs, and killings due to this has increase over time. Our youth are been bullied and into gangs not even by their own decision.

I have read about these crimes that has been so brutal it is so critical to here this. It also so unreal to know that these things become normal to individuals. There are many organizations that offer prevention help today and churches. I remember Bishop Gipson being on television from LA, spoke about he once was a part of gang life and activity. He said a few churches would come out try to persuade the gangs that there is a better way. He said that was for him it took some perseverance. The information and compassion from the Outreach groups. They showed and spoke the love and the words of God. It helped change some of the members life's. It also came with threats of not wanting to be a part of the gangs any longer. In his case it worked out and his

experience from that helps change others. He reaches out in the communities to tell them it ia another way to live.
