What influenced me to join BHU?

To be sincere this institution was unknown to me ever since. Till I joined Nakuru Area church council's jurisdiction as a pastor. Here we have been holding annual leaders conferences where inspirational facilitators have been invited. Our area bishop keeps on encouraging and admonishing pastors to have a room for studies because it is essential for the ministry. He later through the conference organizing committee invited Dr. B Karanja who is the current Beulah Height University's president, and his native origin is Nakuru.

It was then Dr B karanja advertized the university encouraging us to secure admission for its global recognition. According to him, Beulah Height University is global accredited institution. It is capable of handling all disciplines, thus, producing leaders in all fields of high reputation and great worth. This is where I developed interest on knowing more about the institution and took a step to secure admission. Later, Dr. Nzioki who is from Kenya, linked us with BHU, and acted as a coordinator, has therefore played a significant role in tolerating our quizitive attitude until we got oriented to the system. Now unless otherwise I am on track fairing well and trying to balance ministry, studies and family responsibilities.
