

New Years Resolutions

Everyone make plans for the next year. Like talking a professional course, on an international trip, buying a house to take, on a more serious marriage relationship.

But throughout the year many of these projects do not leave the paper lose focus and strength during the year.

In next year, my project is to prioritize the practice of my English every day. I would like to do it in many ways, like listening to music e singing for practice in my church, reading the Bible in English during the year and more than 1000 pages of history books, besides speaking with foreigners.

It is a big challenge for me, but keeps me motivated because I am coursing a good University at the Beulah Heights. I have never dreamed this, but God dreamed it for me.

One of my resolutions is to save money, so my family and I can travel this summer. My daughter dreams to know San Francisco-California. I pray that everyone can return to normal life, with total control of the pandemic.

In summary requires from us a daily dedication to fulfill all the objectives of the year. Because various things that we don't expect happen. During the year can happen new opportunities and we can use it in the best way, so we can also to do unpredictable things. "Focus, Determination, faith, discipline love, family, unity they cannot miss the next year.
