Stop Sep-27-2018 10:49:00 EDT

Step 3: Click on comment tab at bottom and document platelet count. No longer need to cross-check Heparin with another nurse (but not a bad idea to have a peer check your dose). Click ok to close that box and ok to close the box behind that one.

The screenshot displays a medical software interface with multiple overlapping windows. The background window shows patient information for ZZTEST, KELLYLYNNE, a female, born 2-1970, with an age of 48 years. It lists various medical services and a medication administration schedule. A 'Charting for: ZZTEST, KELLYLYNNE' window is open, showing a heparin administration record for 5,000 unit(s) subcutaneous on 02/28/2019 at 1531 EST, performed by Mact RN, Morgan. A 'Comment - ZZTEST, KELLYLYNNE - 990093583' dialog box is the primary focus, containing a text area with the following text: 'heparin: 5,000 unit(s)', 'Comment', 'platelet count 250', and '2nd RN check C. Buoni, RN'. Below the text area are 'OK' and 'Cancel' buttons. At the bottom of the interface, there is a 'Reason' dropdown menu, a 'Comment...' button, and another set of 'OK' and 'Cancel' buttons. The bottom status bar shows the date and time as 27-Sep-2018 10:49:00 EDT.
