

Student Name:

Sepsis TTE

Watch the 2 videos below and answer the following questions. Please submit to Mrs. Helsel's mailbox by **Tuesday 2/7/23 @ 0830**.

*Of note, we will review this class prep on Wednesday when we discuss shock

“It’s Sepsis and You Know It”

<https://youtu.be/cGZcJ-z7GbA>

1. What symptoms brought the client to the emergency room?

Rapid breathing, warm, dark urine

2. Name 2 medications mentioned in the video that are used to treat sepsis.

Zosyn and Insulin

3. List 5 assessments mentioned in the video that suggest poor tissue perfusion.

Tachycardia, decreased LOC, Tachypnea, high lactate/low BP, low SPO2

4. Name 2 reasons why a central line would be indicated to treat this patient.

Can be in place longer, can give higher amounts of fluids and medications quicker

“Sepsy Back”

<https://youtu.be/2WPnP1YBCD8>

5. Fill in the blank: According to the video, “early identification and treatment of sepsis will

Save lives”

6. What symptoms did the patient have that met SIRS criteria?

Low SPO2 (blue), tachycardia, high temp, left shift

Student Name:

7. Name 3 common sources of sepsis and the corresponding diagnostic studies that were ordered

Bacteriuria, pneumonia, bacteremia

8. In the video, how much IV fluid was given before pressors were started?

4 liters

9. What is "Vosyn" and why is it used to treat sepsis?

Vanc + Zosyn. Both are widely used broad spectrum antibiotics. These antibiotics together synergistically fight off MRSA, Pseudomonas, and other dangerous gram negative and gram positive infections
