Cardiac Assessment Definition Match

__H__ Thrill

F. Turbulent sounds occurring between normal heart sounds. Characterized by loudness, pitch, shape, duration. Graded I-VI

_L___ 3rd Heart Sound

D. Small red streaks under fingernails

__I__ Troponins

G. HR > 100

__N__ HDL

E. HR < 60

__F__ Heart murmurs

B. The amount of blood pumped by each ventricle in 1 min. Calculated by Stroke Volume X HR

_D___ Splinter hemorrhages

M. Peripheral resistance against which the left ventricle must pump

_G___ Tachycardia

A. Turbulent flow through artery caused by aneurysm or arterial obstruction

_E___ Bradycardia

I. Contractile proteins released after MI. Both T and I samples test for cardiac injury/ischemia

_A___ Arterial bruit

L. Extra heart sound heard in EARLY diastole, similar to the sound of a gallop. Causes include Left Ventricular failure, volume overload, aortic or tricuspid regurgitation

__J__ LDL

K. Alteration of spine often in elderly resulting in altered chest landmarks, auscultation, and percussion

__B__ Cardiac Output

C. The volume of blood stretching the ventricles at the end of diastole before the next contraction

_K___ Kyphosis

H. Vibration of vessel or chest

_C___ Preload

N. Lipoprotein considered to be the "good cholesterol"

_M___ Afterload

J. Lipoprotein considered to be "lethal cholesterol"
