

## Heart Failure Review

Instructions: Complete the diagram by labeling each symptom appropriately to either right or left sided heart failure

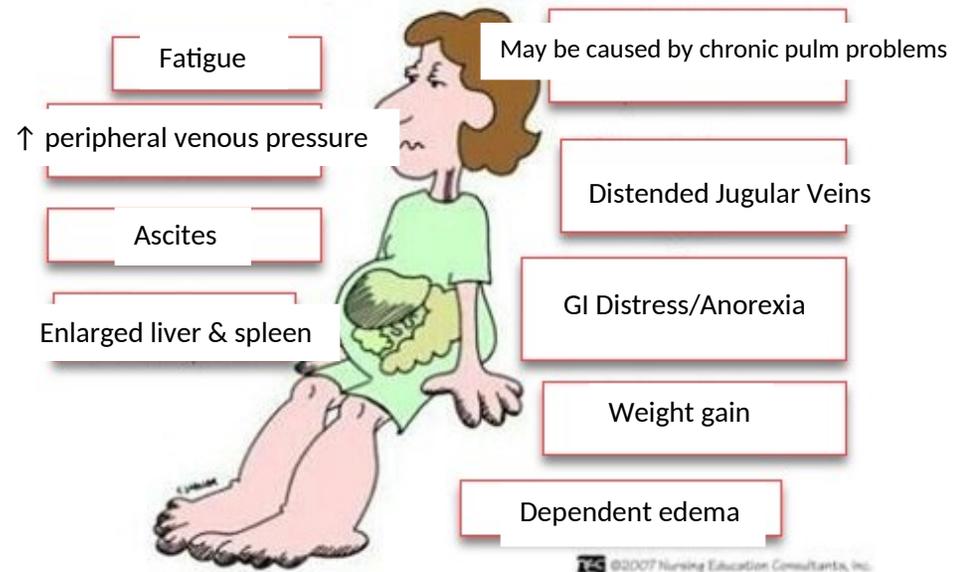

Fatigue	Orthopnea	GI Distress/Anorexia	Confusion
Cyanosis	Distended Jugular Veins	Ascites	Weight gain
Enlarged liver & spleen	Tachypnea	Paroxysmal Nocturnal Dyspnea	Crackles/Wheezes
Restlessness	Dependent edema	↑ peripheral venous pressure	Exertional dyspnea
↑ pulm cap wedge pressure	Cough	Blood tinged sputum	May be caused by chronic pulm problems

### LEFT SIDED ❤️ FAILURE

### RIGHT SIDED ❤️ FAILURE

(Cor Pulmonale)

Label the coronary arteries on the diagram below. For the bolded arteries, state what portion of the heart they feed.

- **Left Anterior Descending (LAD):** supplies blood to the front portion of the left side of the heart
- **Right Coronary Artery:** supplies blood to the SA node, AV node, right atrium, right ventricle
- Left Coronary Artery
- **Left Circumflex:** supplies blood to the left outer side of the heart and the posterior portion of the heart
- Aorta
