

Heart Failure Review

Instructions: Complete the diagram by labeling each symptom appropriately to either right or left sided heart failure

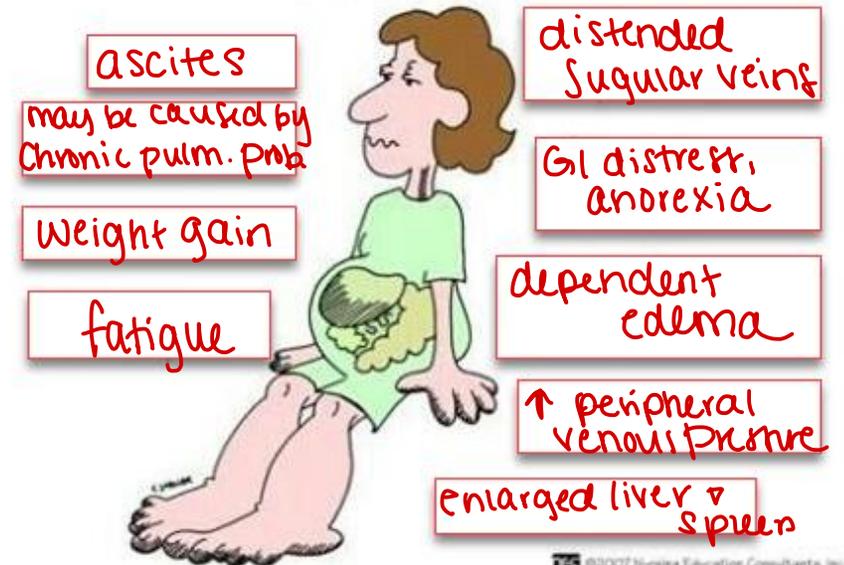

<del>Fatigue</del>	<del>Orthopnea</del>	<del>GI Distress/Anorexia</del>	<del>Confusion</del>
<del>Cyanosis</del>	<del>Distended Jugular Veins</del>	<del>Ascites</del>	<del>Weight gain</del>
<del>Enlarged liver &amp; spleen</del>	<del>Tachypnea</del>	<del>Paroxysmal Nocturnal Dyspnea</del>	<del>Crackles/Wheezes</del>
<del>Restlessness</del>	<del>Dependent edema</del>	<del>↑ peripheral venous pressure</del>	<del>Exertional dyspnea</del>
<del>↑ pulm cap wedge pressure</del>	<del>Cough</del>	<del>Blood tinged sputum</del>	<del>May be caused by chronic pulm problems</del>

LEFT SIDED ❤️ FAILURE

RIGHT SIDED ❤️ FAILURE

(Cor Pulmonale)

Label the coronary arteries on the diagram below. For the bolded arteries, state what portion of the heart they feed.

- **Left Anterior Descending (LAD)** → ANTERIOR VENTRICULAR SEPTUM AND THE GREATER PORTION OF THE ANTERIOR PORTION OF THE LEFT VENTRICLE
- **Right Coronary Artery** → RIGHT ATRIUM, RIGHT VENTRICLE, PORTION OF THE POSTERIOR WALL
- Left Coronary Artery
- **Left Circumflex** → OUTER SIDE AND BACK OF THE HEART
- Aorta
