Student Name _____
ATI Real Life Scenario_____   1

*Complete and submit to the corresponding dropbox by 1600 on the assigned clinical day.

To Be Completed Before the Simulation

** Blue boxes should be completed using textbook information. What do you expect to find? This information should be collected before you start the ATI simulation.

Medical Diagnosis/ Disease: _____

NCLEX IV *(8)***: Physiological Integrity/Physiological Adaptation**   **NCLEX IV** *(7)***: Reduction of Risk**

Anatomy and Physiology Normal Structures	**Pathophysiology of Disease**	**Anticipated Diagnostics Labs** **Additional Diagnostics**

NCLEX II *(3)***: Health Promotion and Maintenance**   **NCLEX IV** *(7)***: Reduction of Risk**

Contributing Risk Factors	**Signs and Symptoms**	**Possible Therapeutic Procedures** **Non-surgical** **Surgical**	**Prevention of Complications** (What are some potential complications associated with this disease process)

NCLEX IV *(6)***: Pharmacological and Parenteral Therapies**   **NCLEX IV** *(5)***: Basic Care and Comfort**   **NCLEX III** *(4)***: Psychosocial/Holistic Care Needs**

Anticipated Medication Management	Non-Pharmacologic Care Measures	What stressors might a patient with this diagnosis be experiencing?

Client/Family Education   **NCLEX I** *(1)***: Safe and Effective Care Environment**

List 3 potential teaching topics/areas • • •	**Multidisciplinary Team Involvement** (Which other disciplines do you expect to share in the care of this patient)

Anticipated Patient Problems, Goals, & Interventions Based on Medical Diagnosis

** This worksheet should be completed before you begin the ATI simulation.

Problem #1:_____

Patient Goals:

    1. _____

    2. _____

Assessments:

    ➤ _____

Interventions (In priority order):

    1. _____

    2. _____

    3. _____

    4. _____

    5. _____

    6. _____

Problem #2:_____

Patient Goals:

    1. _____

    2. _____

Assessments:

    ➤ _____

Interventions (In priority order):

    1. _____

    2. _____

    3. _____

    4. _____

    5. _____

    6. _____

At this time, complete assigned ATI Real Life Simulation

Actual Patient Problems & Goals

** The following should be completed after the ATI simulation.

Problem #1: _____

Patient Goals:

    1. _____

                                          Met ☐

                                        Unmet ☐

    2. _____

                                        Met ☐

                                        Unmet ☐

Problem #2: _____

Patient Goals:

    1. _____

                                        Met ☐

                                        Unmet ☐

    2. _____

                                        Met ☐

                                        Unmet ☐

SOAP Notes Based on Priority Problems

Priority Patient Problem #1: _____

Subjective: *This section explains the client symptoms. Include a narrative of the patient's complaints/concerns and/or information obtained from secondary sources.*	**Chief Complaint:** **PMH:** **Allergies:** **Current Medications:**
Objective: *This section is your clinical observations. Include, pertinent vital signs, pertinent labs and diagnostics <u>related to priority problem.</u>*	**Vital Signs:** **Labs:** **Diagnostics:**
Assessment: *Focused assessment on your priority problem.*	
Plan **<u>*Based on priority problem only</u>** *Include what your plan is for the client. What treatments or medications are needed. You can include procedures, consults, labs/diagnostics, etc. What nursing interventions are being performed?*	**Plan:** **Teaching/Resources:**

Priority Patient Problem #2: _____

<u>S</u>ubjective: *This section explains the client symptoms. Include a narrative of the patient's complaints/concerns and/or information obtained from secondary sources.*	**Chief Complaint:**
<u>O</u>bjective: *This section is your clinical observations. Include vital signs, pertinent labs and diagnostics <u>related to priority problem.</u>*	**Vital Signs:** **Labs:** **Diagnostics:**
<u>A</u>ssessment: *Focused assessment on your priority problem.*	
<u>P</u>lan **<u>*Based on priority problem only</u>** *Include what your plan is for the client. What treatments or medications are needed. You can include procedures, consults, labs/diagnostics, etc. What nursing interventions are being performed?*	**Plan:** **Teaching/Resources:**

<u>Reflection:</u>

1. Go back to your Preconference Template:
    a. Indicate (circle, star, highlight, etc.) the components of your preconference template that you saw applied to the care of this virtual patient.

2. What was your biggest "take-away" from participating in the care of this patient? How did this impact your nursing practice?
