

### ATI Virtual Clinical Questions and Reflection:

- 1) Identify two members of the healthcare team collaborating in the care of this patient:
  - a. **Esther** \_\_\_\_\_
  - b. **Charge nurse** \_\_\_\_
- 2) What were some steps the nursing team demonstrated that promoted patient safety?
  - a. **Assuring no previous reactions have occurred before blood infusion** \_\_\_\_\_
  - b. **Name and DOB before blood transfusion** \_\_\_\_\_
  - c. **\_noticing changes in the patients VS** \_\_\_\_\_
- 3) Do you feel the nurse and medical team utilized therapeutic communication techniques when interacting with individuals, families, and health team members of all cultural backgrounds?
  - a. If **yes**, describe: when the nurse showed a nonjudgmental approach when speaking to the client about her disease and the clients reports of pain very serious.
  - b. If **no**, describe:  
\_\_\_\_\_  
\_\_\_\_\_

### Reflection

- 1) Go back to your Preconference Template:
  - a. Indicate (circle, star, highlight, etc.) the components of your preconference template that you saw applied to the care of this patient.
- 2) Review your Nursing Process Form: Did you select a correct priority nursing problem?
  - a. If **yes**, write it here: \_\_\_\_\_
  - b. If no**, write what you now understand the priority nursing problem to be: **I would expect the priority problem to be Acute Pain.**
- 3) Review your Patient Problem Form: Did you see many of your anticipated nursing assessments and interventions used?
  - a. Were there interventions you included that *were not* used in the scenario that could help this patient?
    - i. If **yes**, describe: such as deep breathing techniques and distracting activities.
    - ii. If **no**, describe:  
\_\_\_\_\_  
\_\_\_\_\_
- 4) After completing the scenario, what is your patient at risk for developing?
  - a. Blood clot or pressure ulcer
  - b. Why? During the endoscopy they found bleeding that could potentially form a clot. Also being in bed can form a pressure ulcer if the client is not turned appropriately.

5) What was your biggest “take-away” from participating in the care of this patient? How did this impact your nursing practice?

I think my biggest take-away from this scenario was how to administer a blood transfusion and how to handle a reaction to a blood transfusion when the client starts showing s/sx. Explaining what is going on to the client as things are happening can help them feel included in their care. This impacts my nursing practice because now I know the priority interventions to complete when this situation happens again.

**SOAP Note Based on Priority Problems**

**Priority Patient Problem #1:** \_\_\_\_\_

<p><b><u>Subjective:</u></b></p> <p><i>This section explains the client symptoms. Include a narrative of the</i></p>	<p><b>History Present Illness (HPI):</b></p>
