

Student Name: Jada Custis
Clinical Instructor: Helsel

ATI Real Life COPD Virtual Clinical Reflection Questions:

- 1) Identify two members of the healthcare team collaborating in the care of this patient:
 - a. Dan-Rt
 - b. Allyson-Rn
- 2) Did your patient have any abnormal blood work (lab)? If so, *select a priority finding* and discuss why that value is concerning.
 - a. Hemoglobin is 9.3, hematocrit is 29% and WBC is 13,000 this indicates that there may be an active infection going on in the body.
- 3) Did your patient have any abnormal clinical diagnostic tests? If so, what were they and what was the abnormal finding? What can that indicate?
 - a. The sputum test was positive for streptococci and staphylococci which mean strep throat, albumin and pre albumin was low meaning protein intake is compromised. The thoracentesis showed fluid surround the left lung.
- 4) What were some of the teaching topics covered in the scenario? Why were they important to the care of this patient?
 - a. MDI- metered dose inhaler
 - b. Why the oxygen couldn't be turned up
 - c. Splinting and coughing
- 5) What were some steps the nursing team demonstrated that promoted patient safety?
 - a. Two patient identifiers
 - b. Hand hygiene
 - c. Communication
- 6) Do you feel the nurse and medical team utilized therapeutic communication techniques when interacting with individuals, families, and health team members of all cultural backgrounds?
 - a. If **yes**, describe:
Yes the team was very interactive with each other so that there weren't any miscommunications also the way the RN interacted with the pt's daughter was very important because she listed while she voiced her concerns
 - b. If **no**, describe:

Reflection

- 1) Go back to your Preconference Template:
 - a. Indicate (circle, star, highlight, etc.) the components of your preconference template that you saw applied to the care of this virtual patient.
- 2) Review your Nursing Process Form: Did you select a correct priority nursing problem?
