## Unit 1 Part 1 – Day 1 Class Preparation Assignment

Watch the 2 Sepsis videos below and answer the following questions. Please submit to Mrs. Hesel's Dropbox by **Tuesday 2/6/24 @ 0830**.

### **“It’s Sepsis and You Know It”**

<https://youtu.be/cGZcJ-z7GbA>

1. What symptoms brought the client to the emergency room?  
**Breathing really fast, warm to touch, dark urine, tachycardia, decreased loc**
2. Name 2 medications mentioned in the video that are used to treat sepsis.  
**Zosyn, levophed**
3. List 5 assessments mentioned in the video that suggest poor tissue perfusion.  
**No urine output, tachycardia, low bp, low o2, mixed venous is low**
4. Name 2 reasons why a central line would be indicated to treat this patient.  
**Get cultures, administer medications**

### **“Sepsy Back”**

<https://youtu.be/2WPnP1YBCD8>

5. Fill in the blank: According to the video, “early identification and treatment of sepsis will **save lives**”
6. What symptoms did the patient have that met SIRS criteria?  
**Breathing but skin is blue, tachycardia, temperature of 102 degrees, left shift voodoo,**
7. Name 3 common sources of sepsis and the corresponding diagnostic studies that were ordered  
**Bacteremia (blood culture), bacteriuria (urine analysis), pneumonia (chest x-ray)**
8. In the video, how much IV fluid was given before pressors were started?  
**4l bolus**
9. What is “Vosyn” and why is it used to treat sepsis?  
**Vancomycin and zosyn, it is an antibiotic used to treat patients with an unknown cause of infection, it works by stopping the growth of bacteria.**
