Heart Failure Review

Instructions: Complete the diagram by labeling each symptom appropriately to either right or left sided heart failure

Fatigue	Orthopnea	GI Distress/Anorexia	Confusion
Cyanosis	Distended Jugular Veins	Ascites	Weight gain
Enlarged liver & spleen	Tachypnea	Paroxysmal Nocturnal Dyspnea	Crackles/Wheezes
Restlessness	Dependent edema	↑ peripheral venous pressure	Exertional dyspnea
↑ pulm cap wedge pressure	Cough	Blood tinged sputum	May be caused by chronic pulm problems

LEFT SIDED ♥ FAILURE

Blood tinged sputum

crackles/wheezes

COUGH

↑ pulm cap wedge pressure

tachycardia

wheezes

Restlessness

tachypnea

Paroxysmal nocturnal dyspnea

Orthopnea

Exertional Dyspnea

Fatigue

Cyanosis

RIGHT SIDED ♥ FAILURE

(Cor Pulmonale)

↑ peripheral venous pressure may caused by chronic pulm prob.

Ascites

GI distress/ anorexia

Distended Jugular veins

weight gain

enlarged spleen and liver

Dependent edema

Fatigue

Label the coronary arteries on the diagram below. For the bolded arteries, state what portion of the heart they feed.

- Left Anterior Descending (LAD)
- **Right Coronary Artery**
- Left Coronary Artery
- **Left Circumflex**
- **Aorta**
