

Heart Failure Review

Instructions: Complete the diagram by labeling each symptom appropriately to either right or left sided heart failure

Fatigue	Orthopnea	GI Distress/Anorexia	Confusion
Cyanosis	Distended Jugular Veins	Ascites	Weight gain
Enlarged liver & spleen	Tachypnea	Paroxysmal Nocturnal Dyspnea	Crackles/Wheezes
Restlessness	Dependent edema	↑ peripheral venous pressure	Exertional dyspnea
↑ pulm cap wedge pressure	Cough	Blood tinged sputum	May be caused by chronic pulm problems

LEFT SIDED FAILURE

RIGHT SIDED FAILURE

(Cor Pulmonale)

Label the colored areas on the diagram below for the colored signs. Use the colored signs on the diagram of the heart.

Label the coronary arteries on the diagram below. For the bolded arteries, state what portion of the heart they feed.

- **Left Anterior Descending (LAD)**
- **Right Coronary Artery**
- **Left Coronary Artery**
- **Left Circumflex**
- **Aorta**

Instructions: Complete the diagram by labeling each structure and identifying the portion of the heart they feed.
