Cardiac Assessment Definition Match

__H__ Thrill

F. Turbulent sounds occurring between normal heart sounds. Characterized by loudness, pitch, shape, duration. Graded I-VI

__K__ 3rd Heart Sound

D. Small red streaks under fingernails

__I__ Troponins

G. HR > 100

__N__ HDL

E. HR < 60

__F__ Heart murmurs

B. The amount of blood pumped by each ventricle in 1 min. Calculated by Stroke Volume X HR

__D__ Splinter hemorrhages

M. Peripheral resistance against which the left ventricle must pump

__G__ Tachycardia

A. Turbulent flow through artery caused by aneurysm or arterial obstruction

__E__ Bradycardia

I. Contractile proteins released after MI. Both T and I samples test for cardiac injury/ischemia

__A__ Arterial bruit

K. Extra heart sound heard in EARLY diastole, similar to the sound of a gallop. Causes include Left Ventricular failure, volume overload, aortic or tricuspid regurgitation

__J__ LDL

L. Alteration of spine often in elderly resulting in altered chest landmarks, auscultation, and percussion

__B__ Cardiac Output

C. The volume of blood stretching the ventricles at the end of diastole before the next contraction

__L__ Kyphosis

H. Vibration of vessel or chest

__C__ Preload

N. Lipoprotein considered to be the "good cholesterol"

__M__ Afterload

J. Lipoprotein considered to be the "lethal cholesterol"
