

Cardiac Assessment Definition Match

__H__ Thrill

~~F. Turbulent sounds occurring between normal heart sounds. Characterized by loudness, pitch, shape, duration. Graded I-VI~~

__K__ 3rd Heart Sound

~~D. Small red streaks under fingernails~~

__I__ Troponins

~~G. HR > 100~~

__N__ HDL

~~E. HR < 60~~

__F__ Heart murmurs

~~B. The amount of blood pumped by each ventricle in 1 min. Calculated by Stroke Volume X HR~~

__D__ Splinter hemorrhages

~~M. Peripheral resistance against which the left ventricle must pump~~

__G__ Tachycardia

~~A. Turbulent flow through artery caused by aneurysm or arterial obstruction~~

__E__ Bradycardia

~~I. Contractile proteins released after MI. Both T and I samples test for cardiac injury/ischemia~~

__A__ Arterial bruit

~~K. Extra heart sound heard in EARLY diastole, similar to the sound of a gallop. Causes include Left Ventricular failure, volume overload, aortic or tricuspid regurgitation~~

__J__ LDL

~~L. Alteration of spine often in elderly resulting in altered chest landmarks, auscultation, and percussion~~

__B__ Cardiac Output

~~C. The volume of blood stretching the ventricles at the end of diastole before the next contraction~~

__L__ Kyphosis

~~H. Vibration of vessel or chest~~

__M__ Preload

~~N. Lipoprotein considered to be the "good cholesterol"~~

__C__ Afterload

~~J. Lipoprotein considered to be the "lethal cholesterol"~~
