

Beebe Healthcare
Margaret H. Rollins School of Nursing
Nursing 101 - Foundations of Nursing
Day 1 Class Prep Assignment

1. According to the Beebe Healthcare's Hand Hygiene policy, identify a situation in which a healthcare worker should use only soap and water to clean their hands. Then identify a situation where a healthcare worker could use waterless hand rub.

- a. Soap and water only: **when hands are visibly soiled**
- b. Waterless hand rub: **before having direct contact with patients**

2. Go to the ATI Module for Infection Control/Isolation found under "Foundational Concepts of Nursing Practice" in Engage Fundamentals 2.0. Find the "Types of Precautions" lesson and watch the Video called "Transmission-Based Precautions." Why was the patient in the video on contact precautions?

The patient in the video is on contact precautions because he has a suspected infection on his leg. The contact precautions are implemented to prevent the transmission of microorganisms through either direct or indirect contact. So, the nurse was permitted to wear gloves and a gown for her PPE.

3. While reviewing the Basic Skills videos, you should notice similarities between the nurse/patient interactions in each video. Based on your observations, what are two (2) things you should do **before** providing any care to your patient?
 - a. **Asking the patient their name and date of birth**
 - b. **Performing hand hygiene**
