

- According to the Beebe Healthcare's Hand Hygiene policy, identify a situation in which a healthcare worker should use only soap and water to clean their hands. Then identify a situation where a healthcare worker could use waterless hand rub.
 - Soap and water only: After contact with chemicals
 - Waterless hand rub: After contact with a patient's intact skin

- Go to the ATI Module for Infection Control/Isolation found under "Foundational Concepts of Nursing Practice" in Engage Fundamentals 2.0. Find the "Types of Precautions" lesson and watch the Video called "Transmission-Based Precautions." Why was the patient in the video on contact precautions?

Because the patient in the video is suspected of having a leg infection.

- While reviewing the Basic Skills videos, you should notice similarities between the nurse/patient interactions in each video. Based on your observations, what are two (2) things you should do **before** providing any care to your patient?
 - Verify the patient's identity by asking them to provide their name and date of birth.
 - Review the patient's medical history and current condition. Explain any questions they may have.

- Fill in the correct medical abbreviations for the following terms:

Bedtime	HS
Four times a day	QID
Dx	Diagnosis
BR	Bedrest
