

- What are types of vital signs?
 - Oxygen saturation, vision, dental
 - **Temperature, pulse, respiration, blood pressure, oxygen saturation**
 - Temperature, blood pressure, visual acuity
 - Heart rate, intracranial pressure, pulse point

- Which blood pressure would be abnormal for an adult?
 - **170/98**
 - 120/60
 - 120/80
 - 130/70

- What is the normal body temperature?
 - 99.5
 - 101
 - 92.6
 - **98.6**

- Why are vital signs important?
 - **They indicate the overall wellbeing of the patient**
 - They are not important
 - So you have something to chart
 - To keep the patient in the hospital longer

- What three things may increase the body temperature?
 - **Illness, infection, environment**
 - Sleep, cold, malnutrition

- Exercise, cold water, eating
 - Illness, fasting, mouth breathing
-
- Name three pulse points?
 - Neck, foot, head
 - **Carotid, brachial, popliteal**
 - Abdomen, heart, lung
 - Rib, artery, pancreas
-
- The pulse point in the neck is called?
 - Neck pulse
 - Dorsalis pedis
 - Femoral
 - **Carotid**
-
- The top number of the blood pressure reading is called?
 - **Systolic**
 - Systemic
 - Selective
 - Symmetrical
-
- The bottom number of the blood pressure is called?
 - Diabolic
 - Distilled
 - Diabetic
 - **Diastolic**

- Respirations is the process of breathing in _____ and expelling _____.
 - Air, helium
 - **Oxygen, carbon dioxide**
 - Oxygen, air
 - Water, bubbles

- A pulse rate of 52 beats per minute is considered?
 - Tachycardia
 - Tachypnea
 - Apnea
 - **Bradycardia**

- Vital signs are normally taken when the person is?
 - Standing only
 - Lying down only
 - **Sitting or lying down**
 - Sleeping

- Your patient has a rectal temperature of 95.6. This is considered?
 - Out of normal range
 - Within normal range
 - **Abnormal**
 - Hyperthermia

- What is the **most** common site for taking a pulse in an adult?
 - **Radial**

- Brachial
 - Pedal
 - Carotid
-
- Which pulse rate would be of greatest concern for an adult?
 - 62
 - **48**
 - 80
 - 74
-
- What artery is used to measure blood pressure?
 - Carotid
 - Radial
 - Femoral
 - **Brachial**
-
- All of the following factors tend to increase blood pressure, **EXCEPT?**
 - **Sleeping**
 - Stress
 - Pain
 - Exercise
-
- Your patient has a blood pressure of 80/56, this is considered?
 - Hypertension
 - Hypocardia
 - **Hypotension**
 - Hypercardia

- How many respirations should a healthy adult have per minute?
 - 60-90
 - **12-20**
 - 18-30
 - 100-120

- When a person is having a difficult time breathing or has labored breathing, this is considered?
 - Tachypnea
 - Apnea
 - Bradypnea
 - **Dyspnea**
